HOW TO CREATE AN ORCID PROFILE & IMPORT YOUR PUBLICATIONS

By: Gillian Griffiths
DISTINGUISH YOURSELF IN THREE EASY STEPS

ORCID provides a persistent digital identifier that distinguishes you from every other researcher and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between you and your professional activities ensuring that your work is recognized. Find out more.

1 REGISTER
Get your unique ORCID identifier now! Registration takes 30 seconds.

2 ADD YOUR INFO
Enhance your ORCID record with your professional information and link to your other identifiers (such as Scopus or ResearcherID or LinkedIn).

3 USE YOUR ORCID ID
Include your ORCID identifier on your Webpage, when you submit publications, apply for grants, and in any research workflow to ensure you get credit for your work.
Get started quickly on ORCID

- Scopus to ORCID helps you quickly set up your ORCID profile by importing profile details and your publication list from Elsevier’s Scopus, the largest abstract and citation database of peer-reviewed literature.

- The wizard helps you to find your correct author profile(s) in Scopus and confirm the list of publications before it is sent to ORCID. Any changes you make here are also submitted as corrections to Scopus.

- Your Scopus author identifier is uploaded to ORCID, and we capture your ORCID and store with your Scopus identifier.

- The service is free to all whether or not your organization has a Scopus subscription.
Go to www.orcid.org and sign up directly to get an identifier and create your profile.

From the profile page, select Import Research Activities. This takes you to a list of services from which you can import your publications.

Pick “Scopus to ORCID” (presently the only option), which takes you to a wizard which will guide you through the process.
At some institutions, an administrator may already have created an ORCID profile for you. If you try to register with the same email, ORCID will ask you to check the existing profile.

You can also enter publications manually, or from other sources once these are available. This allows you to add works that are not on Scopus.

Occasionally, it may not be possible to correctly locate your publications with the wizard. In that case, if you give your email during the process, Scopus feedback team will contact you to fix the problem.
Send Scopus Author details and publication list to ORCID

Your publications on Scopus may be spread over a number of different Author profiles, because these are generated automatically. In order to create a single profile containing the correct publications, please follow the steps in this wizard. On completion, any changes will also be sent as corrections to Scopus.

Once you click on the start button you will get taken to the ORCID site where you can give this wizard permission to read your profile (which we need to find you author ID’s in Scopus) and at the end of the wizard update your Scopus Author ID on your ORCID profile.

Start
Choose “Import Research Activities”
Choose Authorize to connect to Scopus
Select the profiles that are yours

Select your Scopus profiles

Please select all profiles that contain publications authored by you and click the next button to continue.
Review your authored publications

Please indicate below which of the 14 publication are authored by you.

<table>
<thead>
<tr>
<th>Document Title</th>
<th>Author(s)</th>
<th>Date</th>
<th>Source Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>Melatonin: Physiological and pathophysiological aspects and possible applications</td>
<td>Lipovský, M.M., Bühning, M.</td>
<td>2006</td>
<td>Nederlands Tijdschrift voor Geneeskunde 150 (50), pp. 2786</td>
</tr>
</tbody>
</table>
Send the Scopus ID to ORCID

Thank you for checking and correcting your profile. Your Scopus ID is now ready to be sent to ORCID. Any changes you have made will also be submitted to the Scopus Feedback Team for correction on Scopus.

If you have additional information to help complete the profile corrections, please enter it here.

E-mail: myriam@lipovsky.nl
Confirm E-mail: myriam@lipovsky.nl

Additional information:
Scopus Author ID submitted

Your Author ID has been sent to ORCID. However, before we can send your publication list we must ask your permission. If you wish to send your list of publications to ORCID, please continue to the next step. Alternatively you can return to ORCID.
